EXPERIENCE

SOFTWARE QUALITY ANALYST

TATA Consultancy Services | Feb 2019 - Present

- Working in a major project Tamil Nadu Inspector General of Registration
- Involved in various stages of **Software Testing lifecycle** of these projects
- Analyzed the Business Requirements and Developed the Detail Automation Plan and the Automation Strategy
- Debug and Fixed the Scripts Already exist to match the new Test case
- Implemented quality control standards for consistent approach and results
- Developed Automation Scripts for the test cases derived from the requirements using the Automation tool Selenium WebDriver
- Used **Page Object Model** for **BDD and TDD** approach
- Designed and Implemented Hybrid framework with **TestNG and Cucumber** using **Maven** and scheduling the tests using **Jenkins**
- Actively handled defect management process using TCS- Mastercraft dev plus

INITIAL LEARNING PERIOD

TATA Consultancy Services | Dec 2018 - Feb 2019

- Emerging from a non - IT background, and finding it difficult at the beginning, I picked up the Pace of Learning the Concepts of coding and enjoyed the process of learning. By the end of the Training I felt confident enough to be on my own handling Projects
- Trained on Java, SQL, Selenium, STLC phases Java and Agile Methodology
